Reg	No.:	Name:	-
	SEV	APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY YENTH SEMESTER B.TECH DEGREE EXAMINATION(R&S), DECEMBER 20	19
		Course Code: EE403 Course Name: DISTRIBUTED GENERATION AND SMART GRIDS	
Ma	x. M	Duration: 3	Hours
		PART A Answer all questions, each carries 5 marks.	Marks
1		What is an active distribution network? Explain its relevancy in microgrid system.	(5)
2		Explain the operation of a lead acid battery and mention its merits and demerits.	(5)
3		Draw the block diagram of an Automated Meter Reading(AMR) system and	(5)
		write the functions of each block.	
4		Define Energy management. What is the significance of energy management?	(5)
5		Explain briefly the benefits AMI?	(5)
6		What are the different advantages of smart substations over conventional substations?	(5)
7		What are the various types of clouds?	(5)
8		List the various power quality disturbances in the grid.	(5)
		PART B Answer any two full questions, each carries 10 marks.	
9		Draw and explain the typical configuration of a DC microgrid.	(10)
10	a)	Explain the role of central controller in stand-alone and grid connected mode of operation of microgrids.	(5)

- b) Explain the control functions of micro-resource controller (MC). (5)
- Explain the working and operation of different Wind Energy Conversion (10)Systems. Also mention the advantages and disadvantages.

## PART C

## Answer any two full questions, each carries 10 marks.

- 12 a) Draw the block diagram and explain the working of Phasor Measurement 5 Unit(PMU).
  - b) What is a smart sensor? Using block diagram, explain the different components 5

of a smart sensor.

- 13 Explain different scenarios related to the islanding of microgrid? 10
- 14 a) A power station has a maximum demand of 35MW, a plant capacity factor of 7
  50%, a plant use factor of 70% and load factor of 60%. Determine (i) Reserve capacity (ii) Daily energy produced (iii) Maximum energy that can be produced daily if the plant runs as per the schedule.
  - b) Justify the statement 'Greater the diversity factor, the lesser is the cost of 3 generation of power'.

## PART D

## Answer any two full questions, each carries 10 marks.

15	a)	Explain the application of SANET in Smart Grid	5
	b)	List the SANET actors and explain the requirements of these for different Smart	5
		Grid applications.	
16		List and explain the various harmonic sources in grid.	10
17	a)	Explain cloud computing infrastructure.	5
	b)	Explain with neat sketch cloud computing architecture	5
		****
