- 29. Write a short essay on the Net Income approach of capital structure.
- 30. Does financial leverage always increase the earnings per share?
- 31. A company sells a new issue of 10 years, 12% bonds of Rs. 100 each, at par. It will pay interest annually and repay bonds at 10% premium on maturity. What is the cost of bonds? If the tax rate is 30%, what is the after-tax cost of the bond?

 $(6 \times 4 = 24)$

Part D (Essays)

Answer any two questions.

Each question carries 15 marks.

- 32. What do you mean by cost of capital? Explain the different steps involved in the calculation of cost of different sources of capital?
- 33. What do you mean by financial management? Explain its scope.
- 34. What is meant by working capital? Explain the various methods used for estimation of working capital needs of a firm.
- 35. The Krishna company has the following capital structure on 30th June 2017:

		(Rs. '000)
Ordinary shares	•••	4,000
10% Preference shares	•••	1,000
14% Debentures	•••	3,000
		8,000

The share of the company sells for Rs. 20. It is expected that the company will pay next year a dividend of Rs. 2 share, which will grow at 7% forever. Assume a 50% tax rate. You are required to compute weighted average cost of capital based on the existing capital structure.

 $(2 \times 15 = 30)$
